PRESENTATION MENU

The Problem

Customers don't always get accurate recommendations, and mostly receive general feedback on the place rather than the specifics.

Businesses lack an efficient way of collecting customer feedback in order to grow their businesses

Our Solution

A platform that allows users to give and consume item specific reviews and show growth points of businesses.

Features

Search for exactly what you need, filter by distance, price, rating, and availability. Leave your reviews and endorse others'. Have access to the most accurate and up-to-date information.

Future Plans

A2SVian crowdsourcing
Incentive system
Data verification methodologies
Service reviews
Social features
Other industry domains
Expansion throughout the country
Local languages integration
